CAREER OBJECTIVES

Enthusiastic doctor with a broad mind and passion to contribute to the healthcare industry and society. Looking forward to make best of given opportunities and serve with my experience, knowledge and skills for better growth and reputation of the nation.

EDUCATION

Doctor of Medicine (MD)	2002 - 2008
Pirogov Russian National Research Medical University (RNRMU), Moscow	

Sekolah Menengah Kebangsaan Jalan Cochrane, Kuala Lumpur	1997 – 2001
Secondary Schooling	

EXPERIENCE

Assistant Director of Hospital	2018 - Present
Women and Children Hospital Kuala Lumpur, Malaysia	

Medical Officer Anesthesiology & Critical Care	2015 - 2018
Hospital Kuala Lumpur Kuala Lumpur, Malaysia	

Learning from the experts in each subspecialty nurtured my knowledge. I was able develop my skills further in handling various situations and patients. Being in Anesthesia all this years has taught me to plan for every occasion and to be prepared for any circumstances while knowing my limits.

Communication is another skill that I have picked up along the way in dealing with patients and family to alleviate their anxiety as well as on how to break the bad news. Leadership, execution and team play are among other important skills that helped build my character thus far.

Medical Officer Anesthesiology & Critical Care

2015

Hospital Ampang
Ampang, Selangor

A short transit while awaiting for my placement in Hospital Kuala Lumpur. Being the hematology center, it gave me a new perspective in management of a different group of patients requiring surgical interventions and critical care in the ICU. A memorable 4 months.

Medical Officer Anesthesiology & Critical Care

2011 - 2015

Hospital Sultan Ismail (HSI)
Johor Bahru, Malaysia

Began working in the department of Anesthesiology right after completing my horsemanship. Working in this department taught me valuable skills; the need to be on our feet, being meticulous to details, quick thinking and to decipher problems. Dealt with ill and terminally ill patients requiring intensive care as well as chronic pain management.

A part from regular schedules, I was part of the Transplant and Organ Procurement (TOP) Team in HSI since 2013. Rather active in nurturing the locals and promoting the benefits of being a pledger.

I was involved in the clinical teaching of junior medical officers, house officers and medical students when they are attached to the department which is a great joy to me.

Eager to gain more depth into Anesthesia, I applied to be transferred to Hospital Kuala Lumpur where it caters varied portfolio of cases and subspecialties such as Neurosurgery, Pediatric and Neonatal Surgery, Urology and Cardiac Surgeries just to name a few.

House Officer

2008 - 2010

Hospital Universiti Kebangsaan Malaysia (HUKM)
Kuala Lumpur, Malaysia

Rotation in six specialties – Internal Medicine, Orthopedics, Obstetrics and Gynecology, Surgery, Pediatrics and Anesthesiology during my 2 years in HUKM. Anesthesiology and Critical Care was my final posting during the 2 years training and this specialty enticed me the most. This specialty has so much to offer and it is an all-rounder when it comes to patient care and management.
