GOALS

Short term : I plan to pursue my career in hospital management. Using my clinical experiences gained as medical officer and currently as the hospital administrator, I plan to create an environment in which excellence in clinical care will flourish. For that, I am equipping myself with as many skills and experience as possible by getting involved in every aspects of hospital management at Putrajaya Hospital, attending short courses and workshops on clinical and corporate governance. Recently, I have enrolled myself in the Occupational Health Doctor (OHD) course by National Institute of Occupational and Safety (NIOSH) and to bring myself further, I am planning to continue my study in Master of Hospital Management (MHA) soon and continue to engage myself as much as possible in healthcare system management

Long term : As an administrator and a physician in the area of healthcare management, I am inspired to work together with various disciplines and groups in building a better healthcare system that strive for excellence in all aspects of healthcare; providing accessibility, equitability, safe and high-quality care for my nation. I believe that knowledgeable, competent senior managers with good interpersonal skills and leaderships will be able to operate efficiently and effectively in fulfilling this goal. I aim to become a hospital director and as one of the top management in our Ministry of Health in the future
