

Personal information:

Name : Nadya Amin Binti Shaharudin

IC : 870724085740

Address : no 3, laluan desa tronoh indah 5, desa tronoh indah,31750, tronoh, perak.

Hp number : 0176300782

Education background:

Primary and secondary school

1. Chinese School Cameron Highlands
2. Lake Alfred Elementary School America
3. SMK Putrajaya 1
4. SM Sains Kuching Sarawak

University

1. Padjadjaran University Indonesia (M.D)

Working experience

1. Housemanship : Hospital Seri Manjung
2. Medical Officer: KK Changkat Kruing, pkd manjung

Professional/task Involvement

1. Research in the use of electronic stethoscope in the medical field (state level) (2017)
2. Presentation in KOSPEN for the 6 month pilot project weight loss program in Kampung Telaga Nenas (state level) (2016)
3. Quality project (Ergostand) (district level) (2015)
4. Quality project (diabetes checklist and revised ncd book) (2016)
5. Quality project (the usage of recycled materials in clinic setting) (2017)
6. Certificate in Malaysian aesthetics committee part 1
7. Medical Officer in charge of clinic and all programs under clinic

Highlights

1. Can speak 6 different languages (English, malay, mandarin, French, sarawakian, Indonesian). The ability to converse with more people from different ethnic backgrounds helps me to understand the community better and give them a better understanding on health.
2. Published a poetry book at the age of 13 (Words as an Elixir), currently working on a book about living with a family member with cancer.

Summary

I am very passionate about my work as a doctor but as I work alone in my clinic (klinik kesihatan changkat kruing), I have learnt that being a doctor is also about having to learn how to be a leader to my staff, and to the people around me. My ability to speak Mandarin has been handy in communicating with the rural patients who are mainly chinese. It has helped me to become close to the community and in turn I am able to help create more awareness amongst the public in my area. This has further burned my passion as a doctor to not only treat a patient, but to honour the Hippocratic oath and to treat the patient as a whole, to prevent, care and cure each patient with the knowledge I have.

This program will help me to become a better doctor and individual through research, development and leadership. I hope you may consider me for this program. Thank you.
