2011 – 2012 Kuala Lumpur General Hospital (HKL)

2010 – 2011 Hospital Sultan Haji Ahmad Shah
(HOSHAS), Pahang

2008 – 2010 Kuala Lumpur General Hospital (HKL)

Responsibilities:-

2015 – Recent Selangor State Health Department (JKNS)

I was placed under Communicable Disease Control Unit in JKNS since September 2015. Initially I was given the responsibilities to be the head of Zoonoses Sub-unit under CDC. I was involved with multiple researches from universities in Malaysia. In 2017, I was given the task to lead the Surveillance Sub-unit as well. I was involved in multiple outbreak management including the re-emerging disease, and few other disasters that happened in Selangor. Currently, I was given the responsibilities to lead 3 sub-units in CDC JKNS (Zoonoses, Surveillance and Food and Water Borne Diseases).

2012 – 2015 Traditional and Complementary Medicine (TCM)

I started in TCM since September 2012 as an enforcement officer in the Inspectorate Unit. I was given a task to be the head of Intelligence and Operational Sub-unit, and had undergone few enforcement courses, including prosecution courses with multiple agencies. I was also involved in the development of multiple Standards of Procedures (SOP) on operational and other related documents before the enforcement of the TCM Act (Act 775).

2011 – 2012 Kuala Lumpur General Hospital (HKL)

I worked in the Emergency and Trauma Department (ED) in HKL since November 2011 until August 2012. During my working days in the ED, I was assigned to work in all zones, including the red zones and dealing with critical patients. I was also given the responsibility in managing the house officers during the postings and involved in their evaluation before completing their rotation.

2010 – 2011

Hospital Sultan Haji Ahmad Shah (HOSHAS), Temerloh

During my service year in HOSHAS, I was placed under the General Medicine Department and at the same time incharged of the nephrology clinic. Since they do not have a Nephrologist at the hospital, I was given the trust of managing all nephrology patients and also incharged on the hemodialysis unit. It is my responsibilities to ensure all of the nephrology patients were managed and treated accordingly, while still performing as a service medical officer in the general medicine wards and clinics. I was also incharged of managing the House Officers including making their working rotations and also arranging for their evaluation.

2008 – 2010

Kuala Lumpur General Hospital (HKL)

I started my working experience by becoming a House Officer (HO) in the HKL. I choose to work in HKL because I would like to gain as much knowledge and experience as possible while I am still a house officers, therefore I will be a competent Medical Officer (MO) after I completed all my six (6) postings especially if I will be send to district healthcare facilities. During my final posting in the General Medicine ward as a HO, I was given the trust by the department to run as MO and doing MO on call rotation. I learned to take care of various patient conditions from the general ward and also in ICU and CCU.

I have 10 years of experiences in healthcare and dealing with patients as well as handling health management. I graduated from one of the best university in Indonesia, the Gadjah Mada University located in Yogyakarta. During my studies, I was the secretary for the Yogyakarta Malay Student Organization in 2005 – 2006 and later as the secretary of the Malaysian Student Association in Indonesia (PKPMI) in 2006-2007

In 2014, I took the 3-month duration of Occupational Health Doctor (OHD) course conducted by NIOSH. I pursued my study in Executive Master in Occupational and Health

Over the years as a service healthcare provider, I have attended multiple courses on leadership as well as in root cause analysis. I was appointed as an ISO Internal Auditor for 3 years, and became a member in Occupational Safety and Health Committee for 2 years in 2014 – 2015.

I have been involved in multiple researches with the collaboration of multiple universities during my years in services. Few papers have been presented during conferences and 1 paper has been submitted for publishing under European Journal of Clinical Microbiology and Infectious Disease. Previously, I have presented my research on “Awareness on Diagnosing Occupational Disease among Primary Healthcare Medical Officer in Primary Healthcare Medical Officer in Selangor Health Clinic” during a symposium in University of Technology Malaysia (UTM). My second paper was presented during a Asian Pacific Conference in Public Health with the title of “Meliodosis Death in Elderly: A Case Report”. This year, another paper was presented during the oral presentation session in 9th National Public Health Conference 2018, “Middle East Respiratory Syndrome Coronavirus: A Survivor”

Besides work, I am also actively involved in multiple Non-Government Organizations (NGOs) such as Malaysia Integrated Medical Professionals Association (MIMPA) and Medical Mythbusters Malaysia (M3). Our main objectives are to provide information and to educate the public on health information and other related subjects. Other activities including free medical check-ups and home visits at a selected locations and also other community services with the refugees such as vaccination clinic for the refugee children.
