Good in both oral and written English and Malay language

Summary

Clinical Dietetics/ Community – **setting up the first pioneer batch in health clinics**

15+ years' experience assessing the nutritional needs of patients; communicating and consulting the appropriate clinical nutritional information to other members of the health care team; and implementing nutritional care plans; following Medical Nutritional Therapy Standards

- Experience in both hospital and community settings.
- Patients' dietary needs assessment, medical nutritional therapy and nutrition support strategies, program planning/evaluation and implementation.
- Uncommon ability to work in a multi-disciplinary team.
- Profound knowledge and skills in the following health promotion strategies.

Working Experience

Ministry of Health,
Malaysia
since 16/06/2004

Job descriptions:

1. Prepared and implemented individualized dietary care plans based on nutritional needs, dietary restrictions, and other health factors for patients
2. Consulted with physicians and healthcare personnel to determine nutritional needs.
3. Developed and reviewed learning materials related to nutrition, disease and healthy eating
4. Maintained contact with staff from other health departments to network and maximize resources. Partnered with them on large-scale projects (health promotion program) as appropriate
5. Maintained statistics and resource files about programs and reference materials.
6. Planned, provided and evaluated field placement experience for students.
7. Provided training, guidance and support to internal staff and volunteers/peer educators to enhance delivery of food and nutrition programs.
8. Maintained professional competency.
