HOBBIES

During my free time I will go work up and exercise in gymnasium. During holidays I will go for outdoors activities such as mount climbing, snorkeling, diving, white water rafting and jungle tracking.

INTERESTS

I am a very ambitious man. Things that I loves to do mostly will help to built up my personality and becoming better man. I love critical thinking and I read a lot to open up my mind and to improve the way I think. I am also interest in becoming intellectual and efficient leader and will be able to manage an organization towards producing excellent results. I want to built up my government sectors toward an international standard as preserving Asian values.

Why I wish to attend this programme?

I have been working as a profesional clinician and leaders in the government sector for 14 years. Throughout those years I faced a lot of obstacles and challenges in providing the best service and treatment for

the patients. Major changes has to be made by a leader who can understands the core and fundamental problems in an organization and only the person who had experienced these challenges can understand and make the appropriate plan and realistic decision.

I like challenges in my career as it make me better person and efficient leader and servant. Therefore, this programme will help me for better understanding of the best techniques and ways of management an organization. The skill and experience that I will capture during the programme will help me to advance any organization (Hospitals) to be recognized nationwide and international level.

In the current world, leaders must learn the latest and effective way of governing an organization. This programme, will strengthen my capabilities of governance and bring the organization into effective planned implementation.

Besides, I will develop a networking relationship with great and experience local and international leaders. I will also gain experience through active participation in a discussion and sharing brilliant ideas on how to do the best governance in an organization.

Finally, this programme will also help me to be a professional person who, when every step that I move forward, I will bring an organization to success and international recognition.
