Previously was the Secretary General for Children Rehabilitation Centre Club in MARA College Banting 2001 and 2002; participated and organized events at fortnight's interval for 2 years.

HOBBIES AND INTERESTS

I love cooking and baking the most. I believe cooking is an art. I get pleasure from cooking for people to taste, especially in gatherings. It lifts up spirit, connects people in a wonderful way and teaches me the colors and spices of life. I also enjoy reading, traveling and arts. I find reading different genre of books and writings, watching theatres and interacting with local people around the countries that I visited has widen my knowledge and perspective on the world. Being a regular attendant at the local swimming pool, swimming is my *forte* and I used to be trained as a swimming pool life saver.

Being a doctor, I feel honored for being able to listen to patient's problem, gaining their trusts and to help them in the best possible way. This profession is a gift from God for those chosen ones and I am glad to be one of them. I strongly believe that working in multidisciplinary team is the most effective way to deliver the best care to patient.

Currently, my domain revolves around clinical governance and I believe that good understanding of it would bring about a better clinical service planning and provision. Working as Senior Assistant Director in Medical Development Division of Malaysian Ministry Of Health, I am aiming to deliver a well-planned, high quality healthcare services that responds to the need of Malaysian population at large. My work revolves around analysing and planning policies plus guidelines for medical services in MOH hospitals. It involves strategic planning, discussions and projecting current and future needs of medical facilities, hospital infrastructures, medical equipment's and specialties, plus the need to balance its financial and human resources implications.

GOALS

Short term:

I plan to pursue my career in public health. Using my clinical experiences gained as medical officer, I plan to create an environment in which excellence in clinical care will flourish. For that, I am equipping myself with as many skills and experience as possible by attending short courses and workshops on clinical and corporate governance. To bring myself further, I planned to join the International Health Services and Hospital Management course in South Bank London University and engage myself in healthcare system management.

Long term:

Being a civil servant working in healthcare management, I am inspired to work together with various disciplines and groups in building a better healthcare system that strive for excellence in all aspects of healthcare; providing accessibility, equitability, safe and high quality care for my nation. I believe that knowledgeable, competent senior managers with good interpersonal skills will be able to operate efficiently and effectively in fulfilling this goal. I am also keen to further myself in Subject Matter Expert like Healthcare System Financing and Health Expenditure or Health Economics as it would enhance my knowledge and experience further to continue to serve this nation. I will work hard aiming to be a good leader and health manager in my career.
